

namely the punch-work embroidery, has proved a dainty bit of finery not beyond the ability or skill of an amateur. In fact, it is work that even childish hands may complete.

In making this collar use a ma-terial with rather loose mesh, because the large needle employed in puncturing the holes in each dot must push the material into a firm circle without frayed edges, and to do this the goods must separate easily. Use any desired floss for the embroidery portions, but employ a single strand of floss or firm linen for the punch-work parts. Do not embroider the flowers in solid design. The work should be done in outline. The punch-work affords a pretty background, resembling drawn work when completed. The collar is outlined, but one's own neckband should be used for measurements, thereby avoiding the difficulty experienced by most persons when using one collar pattern for all sizes. So far as the embroidery is concerned it can be used on any collar, the only alteration being the neck portion.

A bright bit of color is usually seen in punch-work embroidery. It is decidedly fetching and will brighten the lingerie neckwear suitable for Christmas gifts.

To Prepare Stencil.

Outline the design upon very thin, glazed cardboard, easily bent, or upon the back of white table oilcloth. A pair of sharp embroid-ery scissors and a very sharp penknife will be needed to cut out the designs. A round punch is helpful to take out parts. After cutting out all parts, coat the design with hot paraffin and press with a warm iron if the design is on cardboard. Treat only the back of the oilcloth. A second application of wax makes the pattern impervious to moisture. Use stub brushes, slightly point-

ed. To make stencil paints, use ordinary dyes, desired colors, diluted with water or gasoline. Dip the brush into the dye, pat out the moisture on a folded cloth pad, work the design from the center to the extreme edge, being careful not to allow the moisture to creep under the design. Pin the pattern to the fabric; keep the goods on a pad of newspaper; work slowly. Lift the pattern carefully. When dry, press the goods on the wrong side with a warm iron.

This Beautiful Design Can Be Transferred by the New Process Without Using Old, Tedious Tracing-Paper Method Something New for the Needleworker. Before the Storm.

Journeys to Ancient Shrines.

Rhodes.

By Reb. Samuel WH. Grafflin.

MONG the "seven wonders of the world"—the ancient world—Rhodes. was the stands one whose strange significance has fascination for the Athens; mind of rich, romantic youth, and food for meditation for the riper Antiochus. student of those forces which mold the thought

> and character of men. The "wonder" is the "Colossus of Rhodes," a brazen statue of Apolle, which stood at the famous entrance to the harbor of Rhodes; so huge in its proportions that Jupiter it is said to have bestrode one of the harbor entrances and between whose legs ships in full sail ence upon the Rhodians was good, for his worship was not as debasing as that could pass.

Whether this latter statement is truth or the island legend, or whether the statue merely marked the entrance to the port; or, as is far more probable, did bestride the narrow slip where lay the royal galley we shall never know, but that it was there

at once their pride and deity there is no doubt, and that for nearly remain nine hundred years its huge fragments lay where they were cast first is that of Paul, who, as he passed by an earthquake we also know. There it might have remained until this day had not the thrifty Saracens sold it for junk when they captured the city and island in 656 A.D. With quaint attention to of faithful followers of Christ, who clusdetail their chronicle tells us that the dealer required nine hundred camels to remove the brazen fragments. Allowing the usual the Gentiles, so soon to go to Rome in 500 pounds to the camel, the statue contained 225 tons of brass, an and serene, and chains or liberty were one amount almost incredible, yet doubtless true.

When we come to think of this statue and what it represented. Paul passes to his prison and his doom, but after 1,250 years the Emperor Emices will be held each night except Saturwhen we remember who it was that wrought its fair proportions st.
